		Total pounds.....	904,088,178

TABLE 8

**Total Commercial fish Landings and Shipments Into California During 1951**

The catch of the California fleet is actually the aggregate of deliveries at California ports of all fresh fish, crustaceans and mollusks caught by American fishing vessels in the Pacific Ocean and rivers and streams of California. It is not strictly the total and exclusive catch of the California fishing fleet. The catch actually includes deliveries made by fishing vessels based and registered in Oregon, Washington and Alaska. Conversely, many vessels of the California fleet deliver occasional loads to Oregon and Washington. However, these exceptions are nominal, and to all intents and purposes the designation is correct.

The term shipment is used in the tables to separate all landings in California of fresh fish taken in other states or countries by alien vessels, or vessels of other fleets, and delivered by rail, truck or ocean carrier. The largest portion of the shipments consists of tuna imported frozen from abroad for processing in California. The records of such fish destined
